

We offer two distinct pathways to independence:

Supported Living

Transition

- Enhanced care focussed on the transition from an inpatient stay into a community setting
- Suited to people that may be higher risk and/or have complex care needs
- Wrap around clinical input is received from the assessment stage and is ongoing throughout the placement
- Specialist in house clinical team available to support with dynamic risk management allowing each person to strive towards independence in a safe manner

Step

- Care and support for individuals that have evidenced a progression in their level of independence.
- Community based placement with the appropriate levels of support
- Focus on supporting people with developing their skills in the community to enable a positive social contribution.
- Person centred care in the community; driven by the individual.

Private Tenancies

All tenancies for each person that we support are provided by our partner - Social Care Landlord Ltd. This unique partnership enables the tenant to receive a subsidised rent cost as the Landlord provides a 10% contribution. Resulting in a direct saving for the tenant and the local authority.
All tenancies are 2-3 bedroom properties with a living area, kitchen, dining room and private garden.

INDEPENDENCE

Focussed care provision, coupled with suitable and affordable accommodation, provides a vital step towards greater independence for each person.
